

## **Data from MIs and PRs: Derbyshire Places**

### **Library Contents 1**

This is our data collection relating to places in Derbyshire, consisting mostly of parish registers and memorial inscriptions. Although a great deal of this is available at a variety of on-line sites we still find it essential in checking that information. We also census material containing information which is more accurate than that on-line and we have progressed many 'dead-end' researches for enquirers. Please contact us for details. Our listing of all Derbyshire places will show you what copy registers we have and whether we have listed memorials and/or cemeteries there.
